BOARD D

Suitable Alternative Natural Greenspaces (SANGs)

Mown Grass Paths

Scrub and Herbaceous Aquatic Willflower Planting

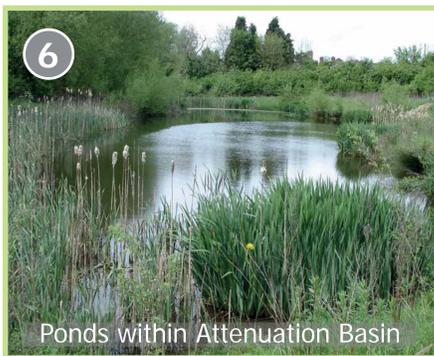

Meadow Grassland

Hoggan Footpaths

Raised Boardwalks

Ponds within Attenuation Basin

The **Southern Country Park** will be an asset for the enjoyment of the whole Chichester community, providing open space for recreation and ecological benefits through a wide variety of planting and Sustainable Drainage System (SuDS) design features which will contribute additional wildlife habitat. A mixture of pathway types will be provided to maintain a rural feel to the park, including raised boardwalks, hoggan and mown paths. The Country Park aspect of the SANGs proposal will be fully secured by stock proof post and rail fencing to allow dogs to be exercised off their lead throughout and once completed will provide access to public open space for both existing and future residents.
